

## METHODS AND SYSTEMS FOR EMBEDDING CAMERA INFORMATION IN IMAGES

### Abstract of the Disclosure

The present invention is related to providing, in association with an image,  
5 information related to the image capture device used to capture the image. In one  
embodiment, information related to a first static camera characteristic and camera  
setting information related to a first captured digitized image is embedded in the first  
captured digitized image using a watermark. The watermarked information may be used  
10 to identify the source or owner of the picture, and/or to aid in the more accurate  
reproduction of the image.
